

EQUIPMENT

Information on equipment for dealing with marine pollution can be found on the European Commission's Community Information System (CIS) at:

http://ec.europa.eu/echo/civil_protection/civil/marin/cis/cis_index.htm

The CIS consists of a Community homepage and national homepages. The national pages consist of country profiles and procedures for response to marine pollution; the location of equipment, ships and aircraft for dealing with marine pollution and conditions for their lease; and other relevant information.
