

2.6 EQUIPMENT

Information on equipment for dealing with marine pollution can be found on the European Commission's Common Emergency Community Information System (CECIS) Marine Pollution at:

<https://webgate.ec.europa.eu/CECIS/login.jsp>

Each Member State (MS) has to log in with its own login name and password.

At the tab resources the equipment can be founded which could be made available by MS on request.

CECIS Marine Pollution facilitates communication between the Emergency Response Coordination Centre (ERCC) and national authorities, making response to disasters faster and more effective. The main purpose of CECIS besides information exchange is to host a database on potentially available assets for use in emergencies. ERCC contact points are available 24 hours a day.
